- Completed my HSC in Vidya Vikas Hr Secondary School with 75% in the year 2014.
- Completed my SSLC in Vidya Vikas Hr Secondary School with 86% in the year 2012.

PROJECT DETAILS

Project : Alpha Web
Role : Automation Test Engineer
Domain : CRM

Description

It's tough to record basic qualifiers like name, contact information and their position in their sales funnel when they first started tracking clients. But now since their business is growing and so is the column count in their spreadsheet. More relevant data is to be added in making the sales, but accessing that information is frustrating. If the search box can't find the customer information they need, then their spreadsheet system is no longer effective. The Software is designed to be instinctive so that locating customer data is quick and painless. No more scrolling and they won't have to search through a pile of records to find a contact.

Development Editors	Script development using Eclipse IDE
Automation Tools	Selenium WebDriver
Automation Framework	Hybrid Driven Framework
Scripting Languages	Core Java
Testcase Development Tool	TestRail
RDBMS	ORACLE SQL
Operating System	Windows
Bug Reporting Tool	JIRA
Browsers	Firefox, Chrome
API Tool	Postman
CI/CD	Jenkins

Roles and Responsibilities

- Requirement gathering and requirement analysis.
- Involved in preparing Test scenarios and Test cases.
- Involved in Functional, Regression, Integration, System Testing.
- Actively involved in logging defects.
- Understanding the Requirement of the Application, Reviewing and Selecting Testcases to be automated.
- Segregating automatable and non-automatable test scenarios.
- Preparing test data for automation.
- Preparation of Generic classes for Reusable Functions.
- Developing POM classes on module basis.
- Developing test scripts for automation.
- Execution of prepared Test Scripts and analysing the result.
- Debugged automated scripts to improve quality.
